

STAT

At Tuesday's Staff Meeting and again at the Noon Meeting, the subject of Colonel White's concern with Agency progress toward year-end ceilings was discussed. After the Staff Meeting, the Office Heads stayed behind for further discussion of this and other subjects. Later, Jack Coffey brought the subject up at the Noon Meeting and suggested to [redacted] that in view of the fact that the DD/P ~~oncerns~~ "credit" at year-end for those double-slotted Support position occupants, he prepare new projections of Directorate year-end strength for DD/S ' consideration.

Therefore, in view of the above, I spoke to [redacted] about the attached memo before the Wednesday Noon Meeting, and we concluded that the memo had been overtaken by these developments and that it should not go forward to Jack. He will undoubtedly be discussing the new projections with us at a later date.

Mr. Coffey via

Subject: On-Duty Strength

1. In our 3 November report on the subject of on-duty strength, we stated our intention to submit a subsequent report, not later than 16 November, which combined our projected gains and losses through the end of the Fiscal Year. Based on that report, we proposed to convene a meeting to analyze a more precise picture of how realistic our 30 June 1971 targets were.

2. A review of our projected gains (attached) show a significantly scaled down EOD target   However, since the largest component of the Directorate (Office of Communications) has not yet completed its internal revision of losses and a possible revision of its EOD schedule, we think it advisable to delay any meeting until we have those revisions. We expect this data not later than 31 December 1970.

3. Beside the factors of EOD controls, monitored losses, potential areas of reductions, and the Development Complement, we will address ourselves to the factor of Directorate careerists encumbering non-Directorate positions.

4. Assuming the availability of the Commo data not later than 31 December, we will submit a comprehensive report not later than 11 January. There will, of course, be a regular monthly status report on or about 7 December.
